

How does the LIADSmart ColorSave® I000 Gravimetric Feeder compare to your feeder?

Smart Clean self-cleaning feature purges material from hopper & screw using compressed air

Outer shell protects load cell & weigh hopper from vibrations & impacts

Inner hopper with single, isolated load cell for precise dosing

3 hopper capacities/9 screw sizes for a wide range of applications from 0.25 - 440lbs/hr

Variety of neckpieces accommodate multiple applications/mounting up to 4 feeders

Single control for injection, extrusion, and extrusion blow-molding

All stainless steel material contact points

Network ready for real-time reporting & data collection

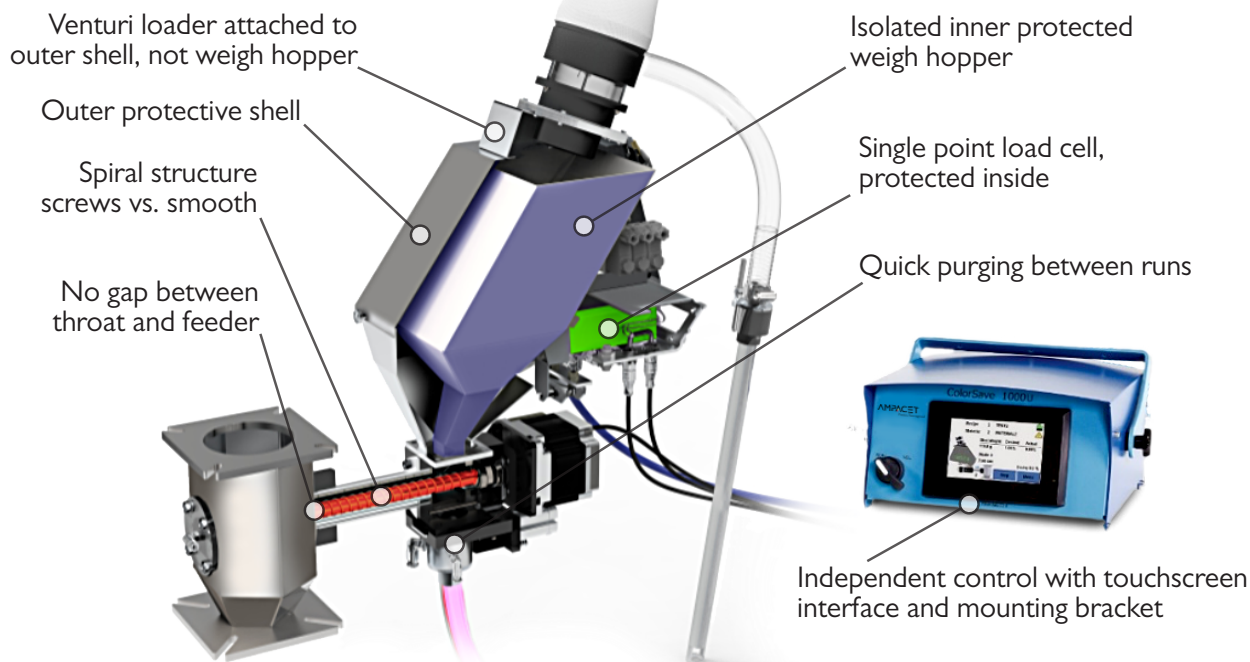

Self-calibrating – saves time and ensures accurate dosing

Stores up to 1,000 recipes for easy job recall & consistency

5-year warranty
