

## Sustainability Solution

How do I improve color consistency when using PCR?

### Overview:

The color of PCR resins can vary widely lot-to-lot depending on the quality of the feedstock collection sorting and recycling processes.

### Problems:

Finished goods show unwanted color variation.

### Solution:

**BlueEdge™** and **Green Edge™** remove the dingy, yellowish tint common in bottles that use PCR.

### Solution:

**Antioxidants** reduce the problems of yellow or pink hues when using PCR.

### Solution:

**Color Matching Service** helps customers uphold the color of their brand when using PCR.
