
ReptyleFx™

**ReptyleFX™ combines
colors, special effects and
functional additives to both
rough and smooth textures.**

Summary

ReptyleFx™ technology combines colors, special effects and functional additives. The unique combination renders both rough and smooth textures with multidimensional color effects — all achieved within a multi-layer film structure, offering designers the opportunity to create exotic new products replicating snake skin's tactile and visual appeal.

The benefits of visual dimensional color and actual surface texture are combined for an engaging, interactive consumer experience.

The patent-pending technology incorporates colors and special effects within the film layers for a new wave of creative and functional advances in flexible plastic film.

Imagination is the only limit to layered effects of color and texture

reptylefx™

Applications

ReptyleFx™ offers a wide range of custom multidimensional effects for applications including stand-up pouches for snack foods and juice beverages, merchandise bags, mailers and personal care packaging. Additional applications can range from consumer tapes and labels, camouflage MRE packaging for the military, to counter tops, cloth fabric alternatives, rain gear and other plastic clothing and car interior trim.
