

BlendSave[®] Compact

Automated Resin Blending and Distribution in a Space-Saving Footprint

BlendSave[®] Compact

- Ideal for new and existing operations
- Any combination of up to 40 materials, up to 10 machines, and 3,300 lbs/hr throughput
- Compact design – only 6' x 6' floorspace and 14' ceiling required
- Automatically delivers any recipe to any machine
- Dedicated material hoppers and weigh bins eliminate the risk of cross-contamination
- Simplifies materials management compared to traditional blenders
- Less equipment
- Less waste
- Less labor

Octobatch[™] Dust-tight Manifold System

- Automates material distribution to machines
- Eliminates manual manifolds and operator mistakes

Optional ColorSave[®] gravimetric feeder for color dosing at the machine

- Accurate to within +/- 0.2% of set point
- Self-cleaning system uses compressed air to change materials at the touch of a button

ERP Integration

- Eliminates manual setup and daily operator interaction
- Automatic recipe selection enables “lights out” operation
- Manage production runs, track material usage, and save historical data

Discover how BlendSave Compact can save labor and streamline production
