## **GMP GHP STATEMENT**

**Subject: Good Manufacturing Practice\* for Food Contact Materials**

Dear Madam, dear Sir,

AMPACET Corporation fully supports the introduction of formal management systems in all its activities. AMPACET Corporation is ISO certified for its quality management.

Particularly, it means we carefully select and control the use of our raw materials in compliance with the relevant international and national legislations, and control our production, quality and supply chain processes in accordance with the requirements of these criteria.

### **Our Position**

Good Manufacturing Practice for food contact materials and articles follows a chain beginning with the approval and acceptance of the raw materials and further covering production, packaging, warehousing and shipment, down the supply chain, to the point where the product is delivered to the converter.

Our masterbatches for use in food contact applications are manufactured in accordance with good manufacturing practice, so that, under normal or foreseeable conditions of use, their constituents will not be transferred to food in quantities, which could:

- (a) endanger human health, or
- (b) bring about an unacceptable change in the composition of the food.

Our quality management system integrates procedures, trainings and internal audits to better control food safety, including complaints handling, product recall and incident management.

Documentation, labeling, information retention and traceability are fully covered by our ERP system (Enterprise Resources Planning) and our procedures.

Additionally, certificates and regulatory information for our products are readily available upon request.

**Information Requests, Questionnaires and Audits:**

Our products and our management system comply with the general principles of Good Manufacturing Practice for food contact raw materials. For any specific information or audit request to verify whether our system fulfills your expectations, please contact your Ampacet sales or technical representative.

Best regards,

*Dr. Rickey E. Strother*  
Global Manager, Quality and Regulatory  
AMPACET Corporation  
2705 Duke Blvd.  
Mason, Ohio 45040

\* Remark: GMP is applicable as Good Hygiene Practice (s) revision 5 (Codex Alimentarius) for Asia.
