

Sustainability Solution

How do I optimize PCR content while preserving aesthetics & functionality

Overview:

Consumer demand and regulations are forcing manufacturers to use more PCRs which have different properties than virgin polymers.

Problems:

Variations in color, odors, mechanical and optional properties, processability and aesthetics affect the use of PCRs.

Solution:

BlueEdge™ and Green Edge™ remove the dingy, yellowish tint common in bottles that use PCR.

Blue Edge & Green Edge

Solution:

ReVive™ compatibilizer-a more efficient way to get greater value from multi-layer film

Revive™ Compatilizer

Solution:

Antioxidants reduce the problems of yellow or pink hues when using PCR.

Antioxidants

Solution:

Desiccants reduce processing problems when using hygroscopic PCRs

Desiccants

Solution:

Color Matching Service helps customers uphold the color of their brand when using PCR.

Color Matching Services

Solution:

Odor Scavenger neutralizes a wide range of odors in PCR

Odor Scavenger
